June 2014 egg production in Texas totaled 417 million eggs, up 1 percent from June 2013, but down 1 percent from May 2014, according to the monthly report released by the Southern Plains Regional Field Office.

The number of layers during June averaged 18.9 million, up 2 percent from last year and up 1 percent from May 2014. Egg production per 100 layers averaged 2,203 eggs, down 1 percent from last year's 2,216 eggs and down 3 percent from last month's 2,260 eggs. Texas hatchery production of broiler-type chicks totaled 53.3 million, down 2 percent from last year.
